

openwise

OpenHub

ESB made by developers for developers

Developers experience

Full-fledged integration framework ready in one install

No bells and whistles, just the effectivity and purpose

'Hello world' in 5 minutes

Building kit just for your case

Enterprise Service Bus

API gateway

Mobile Secure Gateway

Notification gateway

Power of Apache Camel community (connectors, docs)

Enterprise ready

Clusters Horizontal & vertical scalability

Top performance

Guaranteed security on all levels

Up to 24x7 support

Key benefits

Absolut freedom of opensource

Surprising effectiveness of development

Fast adoption rate for beginners

No proprietary technologies, only common standardst

What is OpenHub?

OpenHub is an integration framework. It is intended to be used by Java developers who know their subject and need the proper tool to create the masterpiece.

Primary purpose of OpenHub is to simplify the life of integration developer as much as possible. Everything is made subject to this main goal.

Integration requires smart people. Yet most ESBs force them to dumb role – clicking and configuring.

OpenHub is different

What if each of your integration scenarios is unique? You can either click it in complex and complicated GUI, live with its limitations and shallow understanding of your system, or let your developer code elegant few line solution with a full control. Guess which job attracts smart employees ...

On the other hand you may have hundreds of similar and relatively simple integration scenarios. With OpenHub you don't have to learn yet another ESB GUI. Due to open standards and 100% compatibility you can use de facto industry standard JBoss Fuse or Talend as well as with hundreds of connectors made by Apache Camel community.

Why to use OpenHub and not another ESB framework?

- * your developers will love it
- * no blackboxes, no gotchas, full control over the code
- * opensource with business friendly license

OpenHub is open

OpenHub is open in any way imaginable. Its code is distributed as opensource. OpenHub contains no blackboxes or modules out of your control.

OpenHub is Enterprise ready

OpenHub is powerful, top secured, flexibly scalable and live ESB with professional-grade support. Firm adherence to technological standards, smooth learning curve and wide set of documentation, technological forums and code sources provided by Apache Camel community guarantee that you will never face the problem to find enough developers willing to work with it.

Technologies

- * Spring Framework
- * Spring Security
- * Spring Web Services
- * Hibernate
- * Oracle/ PostgreSQL database
- * Apache Tomcat application server

Target customers

- * Mid-sized companies regardless of segment
